Professional Summary

Full Stack Developer specializing in scalable backend architecture (Node.js, TypeScript, PostgreSQL) and React ecosystems. Strong track record in aligning software engineering with business vision, with proven experience building large-scale products that unlocked millions of reais in revenue and optimized critical processes. Pioneer in the adoption of AI-Driven Development (software lifecycle automation and AI-assisted CI/CD) and structural root-cause problem solving.

Technical Skills

- **Core Stack:** Node.js, TypeScript, JavaScript, React, PostgreSQL, APIs RESTful, Docker.
- **Cloud & DevOps:** AWS, Google Cloud (GCP), CI/CD, Unit Testing, Microservices.
- **Technical Skills:** Java, Python, C#, Firebase, SQL, HTML5, CSS3.
- **Innovation & Management:** IA-Driven Development, Scrum, Kanban.

Professional Experience

Grupo Ri Happy | Systems Analyst - Full Stack Developer (May 2025 – Present)

Tech Stack: Node.js, TypeScript, React, PostgreSQL, Docker, GCP, Anti Gravity

- **"Digital Check-in" Project Leadership:** Conceived and developed a Full Stack national-scale events platform (1,000 to 5,000 people/weekend). Captured +3,000 leads for the CRM and increased sales by over R$100k through reward and loyalty strategies.
- **"Divertudo" Platform:** Technical lead for the architecture of RESTful APIs in Node.js and PostgreSQL for a playground management platform. Enabled R$500k in cash flow within the first 6 months of operation.
- **Sales Engineering & Revenue Unblocking:** Optimized architecture and inventory/pricing pipelines, eliminating checkout journey bottlenecks and unlocking approximately R$6 million in delayed sales.
- **Structural Root-Cause Resolution:** Eliminated recurring bugs in the sales ecosystem (physical and digital), leading the resolution of ~400 critical bugs in one semester to ensure stability and executive transparency.
- **AI Innovation & Governance:** Implemented AI agents to automate the development lifecycle, from Epics creation to CI/CD pipelines and testing.

Algar Telecomunicações S/A | Full Stack Developer Intern (Dec 2022 – Dec 2024)

Tech Stack: TypeScript, Salesforce, Java, Node.js, JavaScript, Python, PostgreSQL, REST APIs

- **High-Performance E-commerce (Salesforce & TypeScript):** Contributed to the development and modernization of the new digital ecosystem using TypeScript integrated with the Salesforce platform, helping consolidate the 3rd most efficient platform in the telecom sector.

- **Algar Easy Buy (1st Place - Talentos de Fibra):** Conceived and developed a Node.js/PostgreSQL SaaS for inventory management, generating million-dollar savings by preventing duplicate purchases.
- **Legacy Systems Support (Java):** Provided continuous support for development, maintenance, and bug fixing in legacy Java-based systems, ensuring internal operational stability.
- **Proactive Monitoring (3rd Place - Innovation):** Developed a real-time failure detection system, reducing customer service call volume by 30%.

Softbox/Luizalabs | Full Stack Apprentice (Aug 2019 – Dec 2020)

Tech Stack: Python, Java, Docker, Git, CI/CD, HTML, CSS, JavaScript

- **API Development:** Maintained and evolved Python and Java APIs integrated into the e-commerce core.
- **Infrastructure & QA:** Containerized development environments using Docker and implemented unit tests in CI/CD pipelines.
- **Mentorship:** Conducted technical onboarding and promoted Version Control (Git) best practices for new team members.

Education

- **Bachelor's Degree in Information Systems** – Universidade Cruzeiro de Sul.

Key Courses & Certifications

- **Backend & Java:** Complete Java OOP (Udemy) and NLW Unite Java (Rocketseat).
- **Cloud & Infrastructure:** AWS Discovery Day (KaSolution).
- **Languages:** Portuguese Brazil, English (Voxy English Proficiency - High Intermediate) and Basic Italian.
